

# SEWER AND MANHOLE REHABILITATION PROGRAM

# NOTICE OF CONSTRUCTION

Project #  
131419  
(Phase 4)

Glendale Water Services Department is in the process of performing construction activities associated with the replacement and upgrade of sewer system infrastructure near your home or business. Community benefits include enhanced odor control, reduced overflows and improved system reliability.

## WE WANT YOU TO KNOW.

- Residents and businesses may experience intermittent noise and traffic restrictions due to construction activity through December 2017. A 72-hour advance notification will be provided prior to crews working in your area.
- Residence, business and emergency access will be maintained at all times.
- The construction contractor may require access to underground sewer facilities located on your property, sometimes within fenced yards, to perform project-related activities; however, access inside homes is NOT required. A 24-hour advance notification will be provided via door hanger by a crew member with appropriate identification if outside access to your business or residential property is necessary.
- If necessary, sewer service lines located within public utility easement or right-of-way may be extended to connect to the newly installed sewer system.
- A 48-hour advance notification will be provided prior to all planned interruptions in sewer service.
- Fences, structures or other work zone obstructions located in utility easement may be temporarily relocated until work is completed.
- To ensure pet and worker safety, please keep pets indoors, confined or on a leash in yards when crews are working in your area.
- If work requires excavation or other disturbance to your property, the affected area will be restored to original condition or better including landscaping in a timely manner upon work completion.

**Safety first!** Keep children and pets safe. Always avoid construction and excavation sites.

## Questions? Call the Construction Hotline at 602-750-7139.

Thank you for your patience during this important construction effort!
