WATER SAFETY IS IMPORTANT THROUGHOUT THE YEAR

Glendale, Ariz. — With temperatures expected to rise into the 80s next week, we anticipate some residents may attempt to go swimming even if the water is cold. Whether or not swimming is on your mind in January, water safety still needs to be front and center and that is why the Glendale Fire Department wants to remind the community about the ABCs of water safety and provide some safety tips so everyone can have a safe and happy 2015.

Remember, water hazards are just as dangerous in the winter as they are in the summer. Drownings don't have an off season...

- An adult who is watching a child should do just that—watch.
- Make sure the gate or door that leads to the pool is always locked. Interior fences provide an additional barrier and should have self-closing, self-latching gates.
- Remember the A-B-C's for water safety:
 - Always have **Adult supervision** around water.
 - **Barrier** fencing around your pool is extremely important.
 - **Classes**: get involved—Adults should take a CPR class and teach their children how to swim.
- Supervision is needed around ALL bodies of water: Never allow your children to play around canals; they are deep and have strong undercurrents.
- Never leave your children while bathing them in the tub or sink. Always have everything you need on hand before you start their bath.
- Children can also drown in buckets, the toilet, or even the dog's water dish.
- The best drowning prevention tip is to always know where your children are, especially when around water.
