## **Teacher Quotes**

“All lessons were wonderful. However, the one that really opened eyes was the lesson on the water cycle. The students actively participated in the process of being water molecules traveling through the cycle.”

“I couldn't believe how organized everything was. There wasn't a single activity that the students didn't enjoy. Awesome program!”

“Overall I was very pleased with the projects and information this program offers. It ties in so well with what I am doing with my students in science and also in social studies. I felt your visit were well geared to my children's level and kept their interest. The information shared was beneficial to them. They loved Wayne Drop.”
