Glendale Police Announce New Online Reporting System

GLENDALE, Ariz. – The Glendale Police Department is proud to announce it will be providing a new online police reporting option for the public. This web based reporting system will allow the public to file certain incident types (minor theft, vehicle burglary, lost property, etc. as well as add additional information to a report such as a list of property stolen or damaged) over the internet at their convenience. The Glendale Police Department expects this internet based reporting service to be very popular among citizens who have come to expect an increased use of technology as part of the department's commitment to service.

The service will allow the public to file a report at a time that is best for them and victims will be able to print a temporary copy of the report upon submission. The report will be reviewed by police personnel and once approved, the victim will receive an email with a copy of the report attached without cost. The report will transfer into the Glendale Police Department's records management system and receive the same investigation and statistical analysis ability as if the report had been filed by a police officer. This web based reporting option will allow officers more time to address community needs while keeping pace with the public expectation to complete services via the internet.

The Glendale Police Department will be using the Desk Officer Online Reporting System from San Ramon, California based software company Coplogic, Inc (www.Coplogic.com).

The web based crime reporting service is available at policereport.glendaleaz.com as are informational videos.
