Glendale Police Detectives Need Assistance in Identifying Human Remains Found

GLENDALE, Ariz. – On Thursday August 11, 2011, while crews were excavating a vacant lot just north of Bethany Home Rd, just west of 67th Avenue, they located human bones. After a Forensic Anthropologist performed an examination, it was determined these remains are from a male with an age range of 35-50 yrs. This person was approximately 5 ft 5 inches to 5 ft 9 inches, weighing 150 – 200 lbs. There is also reason to believe that this person may have been a special-needs adult. Experts believe this unidentified person’s death could have occurred between 2-10 yrs ago. Attached are composites of what the male may have looked like at the time of his death.

Glendale Police Detectives are asking for the community’s assistance in identifying this person. If you have any information, please call The Glendale Police Department at 623 930-3000.
