DIRECTIONAL MAPPING APPLICATIONS

The use of directional and mapping applications such as Waze and Google Maps when approaching the venues is not recommended as they may not consider special event traffic management measures, including temporary travel lane restrictions, road closures, ingress/egress traffic control for each venue and special access routes dedicated to each parking lot. As such, the use of directional and/or mapping applications may result in a longer commute to your event venue.

Know before you go!

Fans should check event venue websites for prohibited items, bag specifications and venue policies.
