

FY 17/18 Pavement Management Projects

Updated 12/29/2017

The Pavement Management Program (PMP) consists of the rehabilitation of poor and deteriorating streets within the City of Glendale with the application of common treatments as well as other pavement preservations methods. The plan to extend the overall life-expectancy of the City of Glendale's streets through the most efficient and cost-saving measures is carried out through a series of pavement preservation projects. The FY 2017-18 PMP Mill & Overlay (M&O) projects are concentrated north of Peoria Avenue while the Crack Seal and Slurry Seal projects are located throughout portions of the entire City.

➤ Major improvements include **Mill & Overlay (M&O)** and subsidiary work (American with Disabilities (ADA) ramps, sidewalks, valley gutters) in four areas. All areas listed in the M&O project are anticipated to be completed this fiscal year with an estimated construction cost of \$7.33 million. The M&O areas include the following:
